

**AMENDMENTS TO THE SPECIFICATION:**

Please replace the paragraph beginning at page 10, line 5, with the following paragraph:

In the second plate 4, which is placed below the ring 2, an intake groove 10, an inlet 11, a discharge groove 12 and a outlet 13 are formed, as shown in FIG. 1. Thus, as illustrated in FIGS. 2-3, the discharge groove and outlet are disposed entirely on one axial side of the rotor chamber.
